# OUR COMMUNITY

We actively leverage the strength of our extensive community of investors. We meticulously analyze specific potential coins, identifying those with promising prospects. Subsequently, we strategically channel investors' funds into these selected coins, capitalizing on the phenomenon known as pumping. Essentially, by injecting significant funds into these new or promising coins, we artificially boost their value.

We always had the idea that the investment industry was missing more broad-minded business values. Citi Tech has a very forward-thinking approach and has always adopted a very flexible business philosophy which has helped us tap into different sectors of the investment sector with great success.

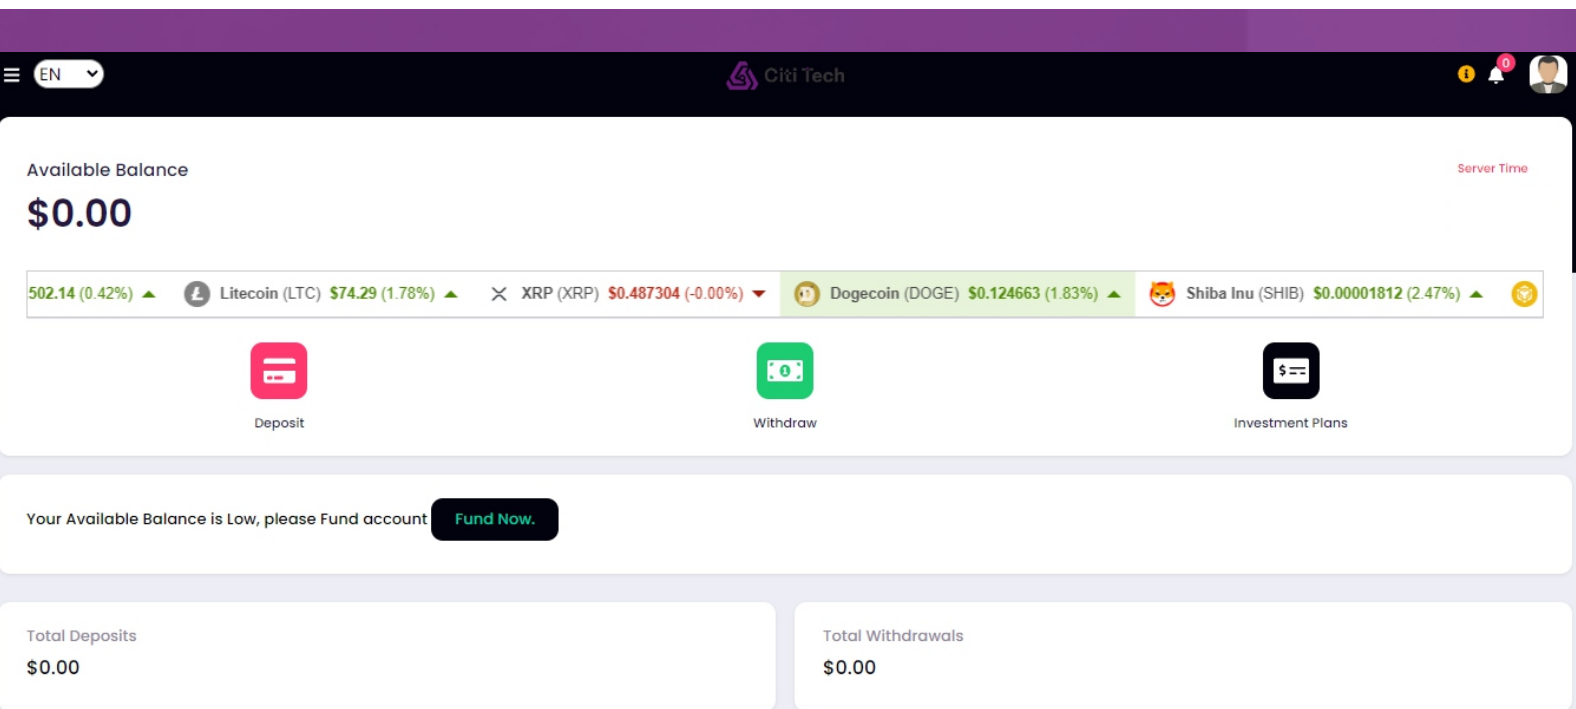

Since the founding of Citi Tech, our principles have been absolute transparency, dedication to our clients, as well as a complete understanding of the features of our profile market and the expectations of different types of investors.
